

Task#3

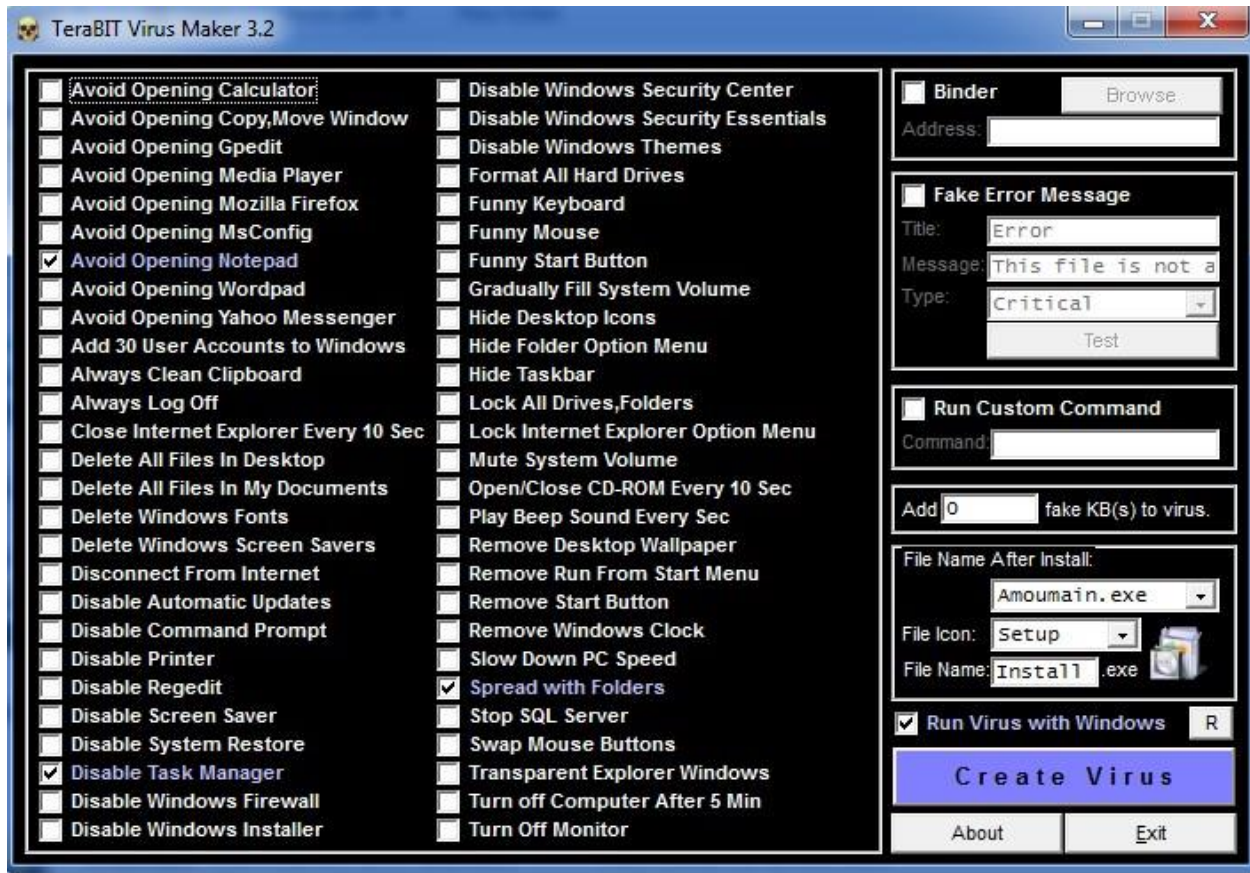

Create and execute virus in victim machine.

Download TeraBit Virus Maker from the internet.

Task#3

Open TeraBit Virus Maker exe file.

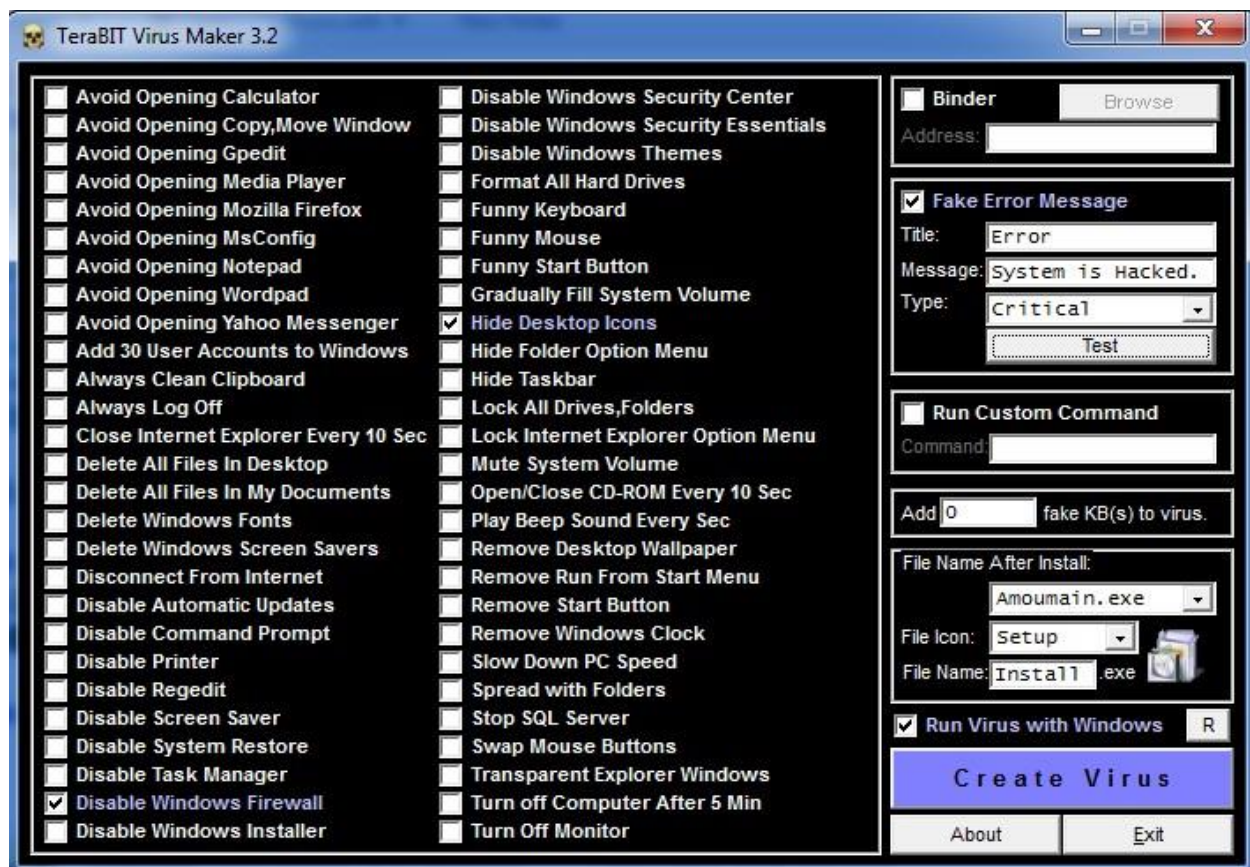

Task#3

Select from the list of actions you want to execute on the victim system.

After selecting and writing the file name for the virus in executable format..

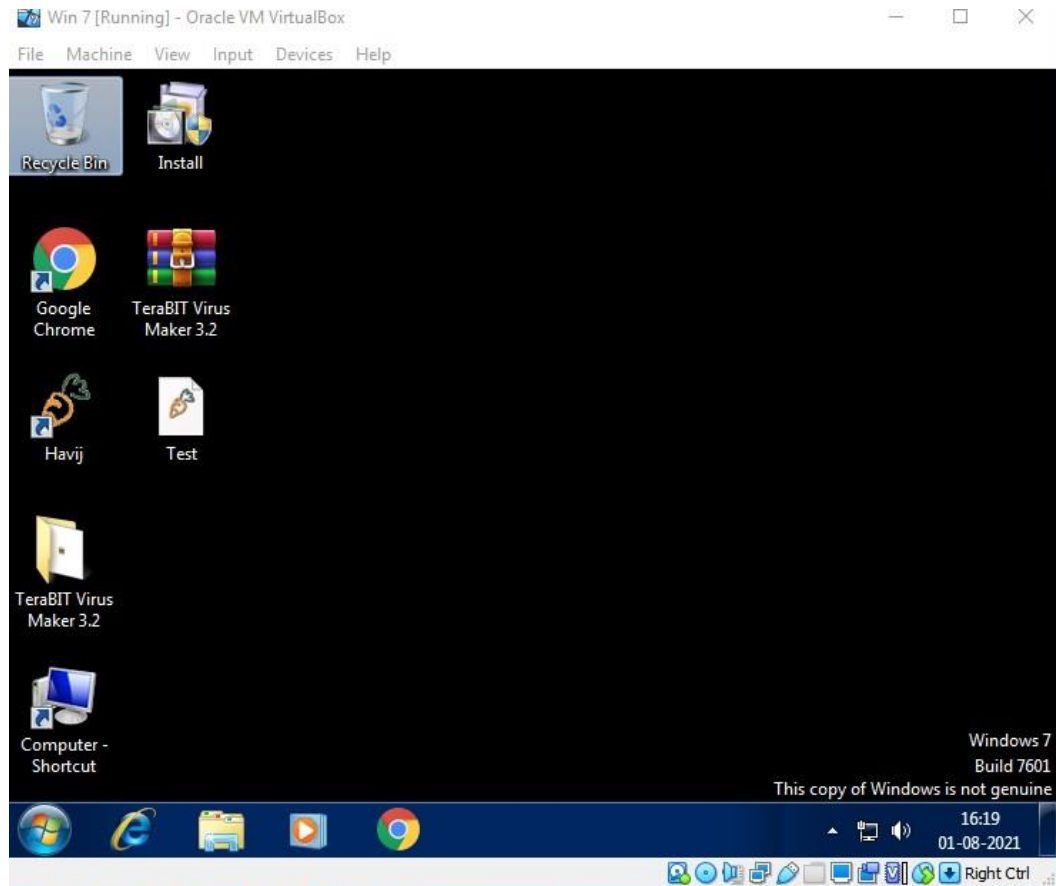

You can also enter fake error message to be shown on victim's system.

Now we will transfer this file to the victim's system.

And make him to execute the file so that the selected actions can be executed.

Task#3

Task#3

How to prevent malware

1. Keep your computer and software updated. ...
