

Task#4

- To write a small batch program and save as .bat extension and execute in victim machine.

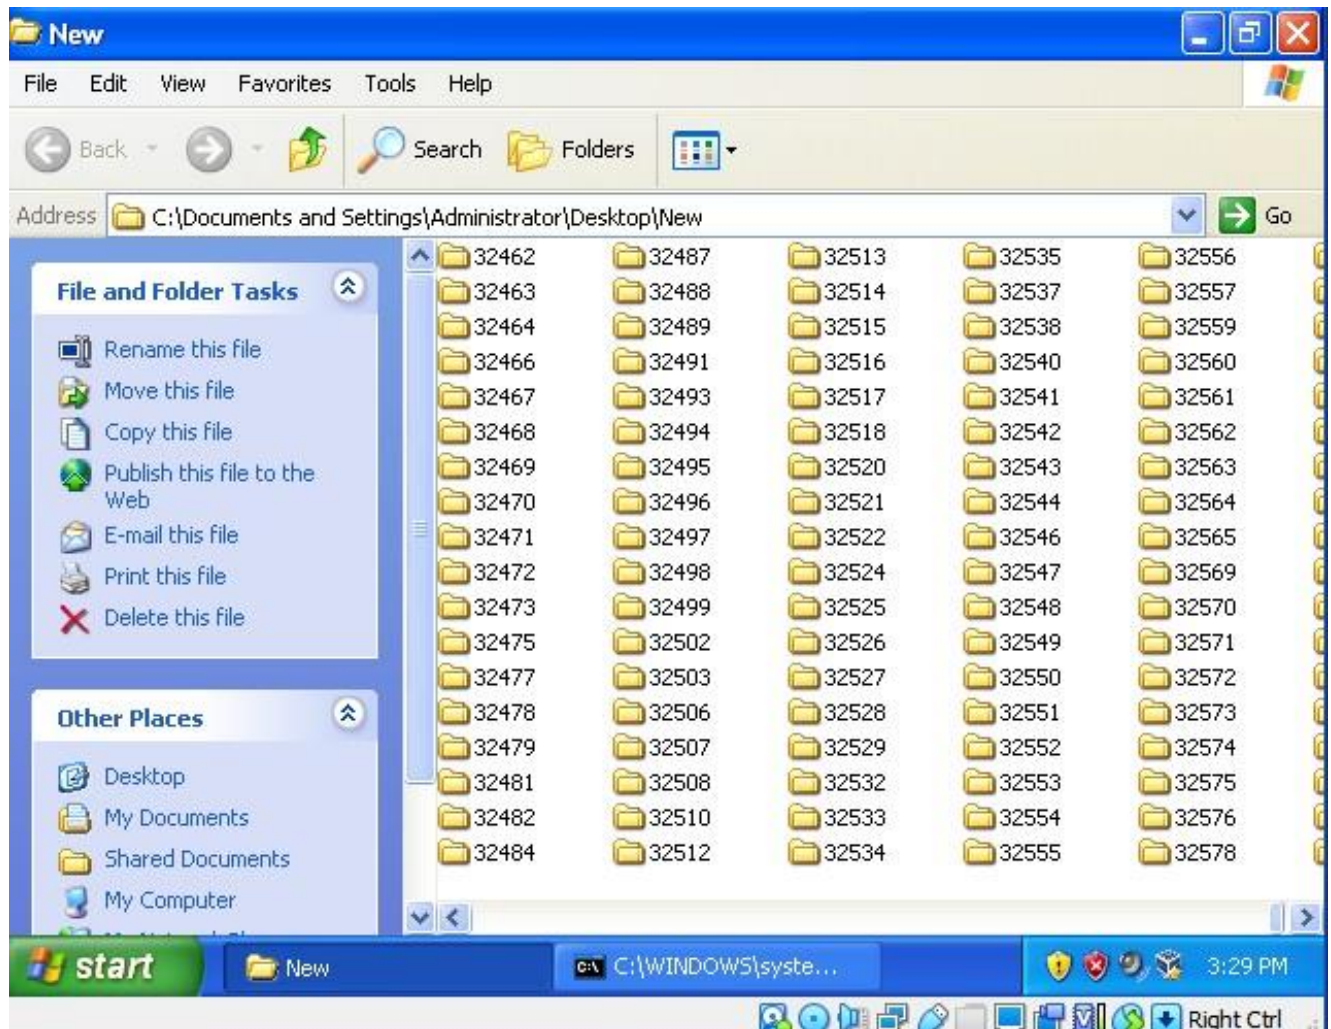

This script will create random directories in the present directory.

Here, “md” command is used to create new directory and “%random%” is used to give random name to the directory and the loop will run x no. of times.

Task#4

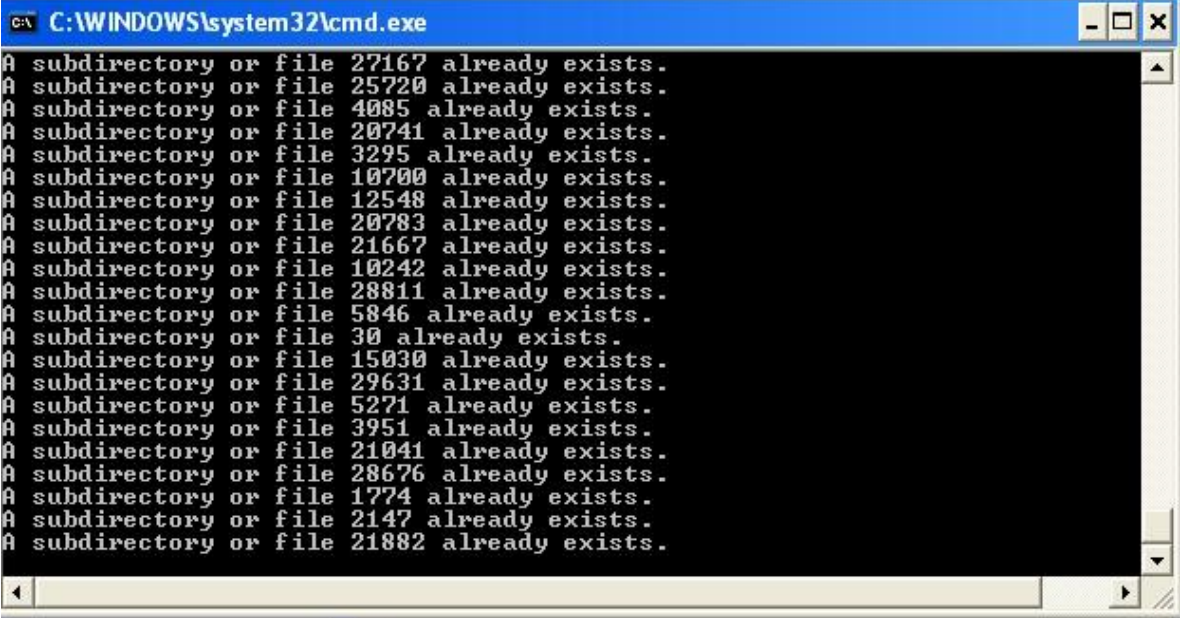

Directories created after the execution of script in the current directory where the bat file was stored.

Task#4

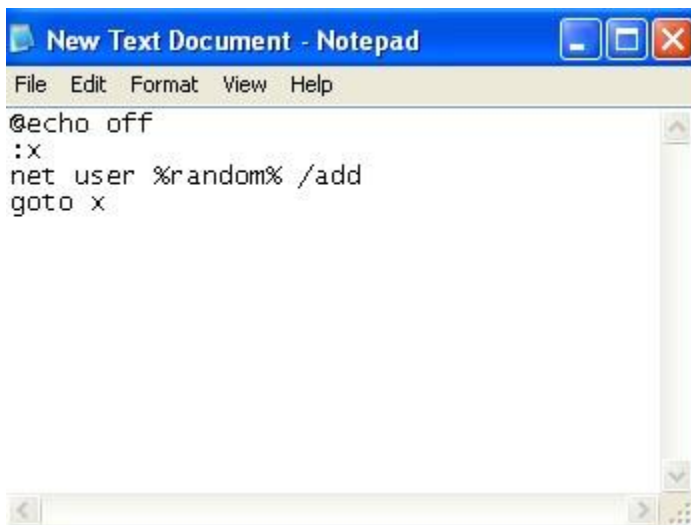

Cmd running the commands.

Command or script will not be visible in cmd because we used “@echo off”.

```
C:\WINDOWS\system32\cmd.exe
A subdirectory or file 27167 already exists.
A subdirectory or file 25720 already exists.
